

# Cable Ties

## Flexibore® installation accessory

Well-snaked power cable secured with Cable Ties

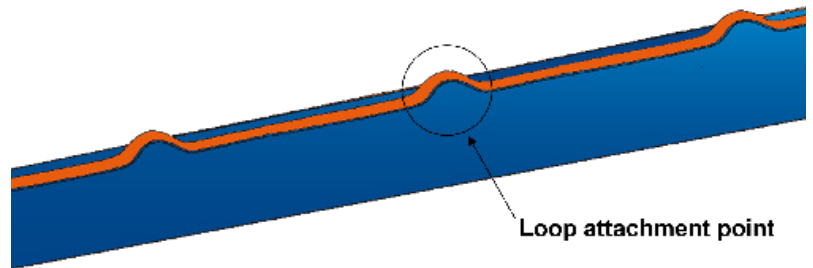

**Cable Ties** are a quick and easy way to secure your power cable to Flexibore, our flexible rising main. Flexibore is manufactured with a coloured strip that creates loop attachment points to secure your power cable. Depending on the thickness of the cable, one or two **Cable Ties** are required at each loop point.

### Loop attachment points location:

FB100 all  $\varnothing$  = loop attachment point at every 1 m

FB250 < 102 mm  $\varnothing$  = loop attachment point every 1 m

FB250 > 102 mm  $\varnothing$  & FB150 all  $\varnothing$  = loop attachment point every 0.5 m

Loop attachment point

Although **Cable Ties** are best suited to FB100, they are also suitable when securing smaller diameter power cables to FB250 & FB150 to depths of up to 150 metres. Refer to our Flexibore User Guides for the best results.

Heavy-duty polypropylene Cable Ties

### Cable Ties for Flexibore 100

Hose diameter (ID)	32 mm	51 mm
